PROFESSIONAL SUMMARY

Aspiring Full Stack Web Developer currently progressing through a structured 6-module web development program with freeCodeCamp. Certified in Responsive Web Design with a strong foundation in HTML and CSS, including responsive layouts, Flexbox, and modern web design principles.

Focused on building clean, responsive, and user-friendly web interfaces while continuously improving through practical projects and real-world implementation. Actively developing a public portfolio through GitHub and live project deployment.

Currently expanding skills toward JavaScript and full stack development while strengthening version control, project structure, and deployment practices.

TECHNICAL SKILLS

Front-End Development

- HTML5
- CSS3
- Responsive Web Design
- Flexbox
- CSS Grid

Tools & Platforms

- GitHub
- VS Code
- Browser Developer Tools

Currently Learning

- JavaScript
- Python

- Git Workflow
 - Web Deployment
 - Relational Databases
-

CERTIFICATIONS

Responsive Web Design Certification

freeCodeCamp

Completed: April 2026

Skills acquired:

- HTML5 fundamentals
 - CSS styling and layouts
 - Responsive design principles
 - Flexbox and modern layout systems
 - Accessibility basics
 - Mobile-first design practices
-

PROJECTS

Responsive Product Landing Page

HTML & CSS Project

- Developed a fully responsive landing page using HTML and CSS
- Applied Flexbox and responsive layout techniques
- Focused on clean UI structure and usability
- Optimized layout for desktop and mobile devices

GitHub Repository: [tshebwej7/SmartWatch-Pro-Landing-Page](#)

Live Demo: [SmartWatch Pro](#) | [Modern Smartwatch](#)

Survey Form Website

HTML & CSS Project

- Built a responsive and user-friendly web form interface
- Structured form elements for usability and readability
- Implemented responsive behavior across multiple screen sizes

- Focused on accessibility and clean design practices

GitHub Repository: [tshebwej7/developer-survey-form](#)

Live Demo: [Developer Experience Survey 2026](#)

Technical Documentation Page

HTML & CSS Project

- Created a structured multi-section documentation webpage
- Designed clear navigation and readable content layout
- Applied responsive design principles for different devices
- Organized content using semantic HTML structure

GitHub Repository: [tshebwej7/python-technical-documentation](#)

Live Demo: [Python Technical Documentation](#)

Book Inventory App

HTML & CSS Project

- Developed a responsive Book Inventory App and structured reading tracker
- Focused on typography, spacing, and visual hierarchy
- Implemented responsive image handling and clean layout structure

GitHub Repository: [tshebwej7/book-inventory-app](#)

Live Demo: [BookVault | Inventory App](#)

EDUCATION

Full Stack Web Development Program (In Progress)

freeCodeCamp

[2025] – Present

Current progress:

- Completed Responsive Web Design module
 - Building practical projects for portfolio development
 - Progressing toward front-end and back-end development technologies
-

DEVELOPMENT GOALS

- Continue progressing through full stack development curriculum
 - Build and deploy professional-quality web projects
 - Strengthen front-end and back-end development skills
 - Gain professional experience through internships or entry-level opportunities
-

ADDITIONAL INFORMATION

Portfolio Focus

Actively building and improving a public developer portfolio through GitHub repositories and live project deployments.

Work Style

- Detail-oriented
 - Consistent learner
 - Focused on practical implementation
 - Committed to continuous improvement
-

LINKEDIN HEADLINE

Aspiring Full Stack Web Developer | Responsive Web Design Certified | HTML & CSS | Building & Deploying Real-World Projects

LINKEDIN ABOUT SECTION

I am an aspiring Full Stack Web Developer currently progressing through a structured 6-module development program with freeCodeCamp. I have earned my Responsive Web Design certification, where I built a strong foundation in HTML and CSS, including modern layout techniques such as Flexbox and responsive design principles.

I focus on building clean, responsive, and user-friendly web interfaces, and I actively convert my projects into real, accessible websites through live deployment. Each project is developed with attention to structure, readability, and usability, ensuring it reflects real-world standards rather than basic coursework.

My work is documented and shared on GitHub, with live demos available to demonstrate functionality, design quality, and responsiveness across devices.

Current focus:

- Developing and refining responsive web projects
- Deploying projects as live demos
- Strengthening Git & GitHub usage

Next step: Advancing into JavaScript and dynamic web applications.

I am open to entry-level opportunities, internships, and collaborative projects.
